IMPERIAL SCHOOL OF BANKING AND MANAGEMENT STUDIES · PUNE

Final Capstone List of Projects

Agentic AI & Advanced Analytics in Finance · PGDM Semester III · Batch 2025–2027
87 project groups · 174 students · Faculty: Tejas Jadhav, CFA, FRM

A note on the titles

Seventy of these eighty-seven titles are exactly as the students submitted them. Seventeen changed, and each one is marked in the table so you can see which.

Thirteen were revised because the project as submitted could not meet the capstone requirements. Four needed data that no organisation publishes, and the guideline permits secondary data only. Five had no financial calculation to defend, and twenty of the fifty marks test exactly that. Three were calculators that produce a number but no finding. One was not a finance topic. In every one of the thirteen the subject area was kept. What changed is the question the project answers.

Three were allotted because those groups submitted no title by the deadline. **One was merged** because that pair submitted two different titles and a group carries one project.

If your title changed, read your group's entry in the Capstone Project Expectations document. It states your research question, your data source and the calculation you must build. Speak to the faculty if you want the reasoning for your own title.

REVISED the project was rewritten to meet the requirements ALLOTTED no title was submitted MERGED two titles were submitted for one group

Group	Student Name	Capstone Project Report Title (Assigned by Faculty)
1	Nikhil Kumawat Abhishek Shah	AI Based Financial reporting to LPs and GPs
2	Mimansa Priyadarsini Sachin Bhadouria	Intelligent Portfolio Risk & Financial Insight Platform
3	Mahak Bansal Ayush Narendra Kale	Statistical Learning-Based Quantitative Trading Strategy for the Indian Equity Market
4	Tulshi Prasantbhai Pal Naman Nihalani	BASEL RISK MIGRATION - AI-Powered Regulatory Arbitrage & Systemic Credit Intelligence
5	Abhijit Kumar Mandal Pooja Chakraraj Joshi	Advanced AI-Powered Tax Research
6	Chopda Meet Rupesh Kumar Ranjan	AI-Powered Equity Research and Valuation Assistant
7	Prabhu Ashish Senapati Aniket Dattaram Gawade	AI-Based Mutual Fund Recommendation and Portfolio Optimization System
8	Sakshi Kailas Sawant Shrirang Vinod Hiwarkar	Rolling cash flow forecaster - Predicting 13-week or monthly cash flow using historical patterns + AR/AP aging data
9	Poonam Mahendar Singh HARESH SURESH PALVE	“AI-Driven FP&A Decision Intelligence: Automated Variance Analysis, Forecasting and Executive Reporting”
10	Choudhary Joniya Suresh Kumar Chetana Adhiya	AI-Powered Robo-Advisory and Wealth Management
11	Sapna Kumari Japjee Ahuja	AI Working Capital & Cash Flow Early Warning System
12	Sahba Kausar Sumit Gorai	FinAgent - Multi-Agent AI Equity Research & Portfolio Intelligence Platform
13	Vaishali Patel Nishant Madan Ingole	Smart Finance AI: Personal Debt and Repayment Optimization Platform
14	Gupta Sejal Rajkumar Abhinav Panchal	AI-Based Corporate Bond Credit Spread & Rating Migration Analyser ALLOTTED
15	Janhavi Jayram Gugale Pranav Adhikar Mali	AI Portfolio & Risk Analyzer

Group	Student Name	Capstone Project Report Title (Assigned by Faculty)
16	Satyam Mahadev Shelke Kavi Katiyar	PMS Services powered by AI
17	Dimple Chunnilal Pawar Harsh Sarle	An AI-powered platform for NSE/BSE stock analysis that extracts annual reports, performs fundamental and technical analysis, and generates buy/sell/hold signals to support smarter investment decisions
18	Manish Tripathi Rushikesh Mangesh Thorat	Effective Tax Rates at Indian Listed Companies: Explaining the Gap from the Statutory Rate REVISED
19	Snehal Kailas Gade John Martin	AI-Based Automation of NAV Calculation and Validation in Fund Accounting
20	Vedant Damodar Naik Ankush Raj	Credit risk / loan default prediction model
21	Ayushi Jaiswal Dependra Singh Sisodiya	Ai Driven Equity Research & Portfolio Management
22	Soumya Ranjan Das Jyoti	AI Portfolio Rebalancing Manager
23	Harsh Soni Prachi Gupta	AI - Assisted Financial Analysis & Dashboard Services For SMEs/Startups
24	Aditya Sandip Ghadwaje Dhruv Sahu	AI powered financial forensic analyst
25	Piyush Agarwal Joseph Josiah Cardozo	Market Regime Detection and Allocation Switching: Does Regime-Aware Allocation Beat a Fixed Mix? REVISED
26	Yogendra Singh Rana Mahesh Sadashiv Bhupati	FinSmart AI: A Low-Cost AI-Enabled Financial Analytics Service for Small Businesses
27	Pranav Sandip Chavan ANAMIKA SINGH	Auditor Qualifications and Emphasis of Matter: What Do Modified Audit Opinions Predict? REVISED
28	Harshvardhan Soni Utkarsha Bandhe	Which NSE Disclosure Categories Move the Price? Abnormal Returns by Announcement Type REVISED
29	Rithika Shashidhar Krishna Sanjay Bembade	AI-Powered Equity Research & Investment Intelligence Platform
30	RITIKA MAHURKAR Rupali Shyam Mohol	FINMATE AI — AI Virtual CFO for Small Businesses
31	Harshal Rajendra Neve Kushanki Kesharwani	"FINIOS" The Fundamental Analyst.
32	Rohit Shrinivas Kore Saahil Manoj Kingre	"MarketPulse India" — An AI-Powered Macro Intelligence & Multi-Factor Stock Recommendation Engine for the Indian Equity Market
33	Sumit Kumar Mandal Rabheru Harsh Manharlal	Do Management Guidance Ranges Predict Reported Results? REVISED
34	Shubham Soni Shivani Madanbhai Rathod	Bank Lending Concentration and Sectoral Credit Risk REVISED
35	Rishi Sharma Abhishek Tiwari	use ML to forecast inflows/outflows for a category of funds based on market indicators, and discuss implications for liquidity management
36	Karm Brijeshkumar Darji Neha Pravin Kuralkar	AI-Based Credit Risk Assessment and Loan Default Prediction
37	Shubham Digambar Sangle Ashish Awasthi	AI-Based IPO Listing Gain Prediction Model for Indian IPOs
38	Ayush Ghagre Prajwal Rathore	AI Based Stock Recommendation System with Buy , Sell and Hold Recommendation of that Stock with Reasons and Financial Data
39	Anshuli Saxena Sahu Premkumar	CollectAI: An AI-Powered Accounts Receivable Management and Payment Risk Prediction System for MSMEs
40	Bhojraj Krishna Kamdi Vivek Rajesh Rudani	Personalized Stock Recommendation Engine Using Risk Profiling, Investment Horizon, and Capital Allocation

Group	Student Name	Capstone Project Report Title (Assigned by Faculty)
41	Utkarsh Anand Pratap Singh Priyanshu Jain	AI Financial Document & Earnings Report Analyzer
42	Tanishq Manoj Sapare Kaustubh Narendra Boraste	Intelligent Stock Market Decision System Using AI
43	Shravani Rajiv Pittulwar Ragini Vinod Kumar Nishad	Cost Structure Analysis of Listed Companies: Where Operating Expense Ratios Diverge Within a Sector REVISED
44	Avkash Suresh Kothale Amruta Pankaj Biswas	AI-Powered Cooperative Banking Liquidity & NPA Early Warning Dashboard
45	Vaibhav Hemraj Bramhankar Shubham Patel	Real-Time Financial News Summarization and Sentiment-Driven Trading Signal Generator
46	Aayush Vishal Karwa SOUMIK SADHUKHAN	AI WealthPilot - AI-Powered Investment Allocation, Trade Risk Assessment & Algorithmic Strategy Optimisation MERGED
47	Chirag Gupta Harshal Saurkar	Ai powered IPO Analyzer
48	Vaidik Basal Vedika Mahadev Belekar	Old versus New Tax Regime: Where the Choice Flips, and How Many Taxpayers Sit Near That Line REVISED
49	Saharsh Vinay Ganorkar Sumit Suresh Shinde	AI-Powered Mutual Fund Factsheet Summarizer + Red-Flag Detector
50	Kanishka Parihar Priyansh Sangotra	AI Investment Research & Portfolio Risk Platform
51	Deepali Agrawal Achal Ghumre	AI Loan & Credit Assessment Engine
52	Nancy Keshri Prachi Gajanan Barsagade	Fund Expense Allocation & Accrual Automation Model
53	Takvo Topden Lepcha Jeet Subhash Thavrani	AlphaGuard AI: Multi-Asset Algorithmic Trading & Risk-Managed Investment Advisory System
54	Aditi Yadnyadatt Pingle Ananya Anand	AI IPO Research & Valuation Assistant
55	Mehak Sachin Singhal Yash Agrawal	AI MIS & Dashboard Automation for SMEs Project
56	Khushi Arun Shende Akshat Jain	AI-Powered Management Commentary Analyzer for Financial Decision-Making
57	Anubhav Sanjay Thombare Radhika Gupta	Stock Market Sentiment Analysis
58	Shreyas Sameer Pujari Gaurav Subhash Hajare	AI powered merger and acquisition target screening & valuation model
59	Khushbu Prashant Jaiswal Sachin Sudhir Kanojiya	AI-Based Corporate Actions Processing & Reconciliation Engine ALLOTTED
60	Amit Anandrao Patil Trupti Vikas Tekawade	"AI Deal Team: An Agentic Pipeline for End-to-End M&A Deal Valuation & Structuring
61	Vipul Kumar Singh Shruti Sanjay Paradkar	AI-Based Prediction of Stock Volatility Risk Using Financial and Market Indicators: An Empirical Study of Indian Listed Companies
62	Sudhanshu Kumar Abhishek Mahesh Chavan	Does Announcement Timing Affect Price Reaction? Pre-Market versus Post-Market NSE Filings REVISED
63	Vaishnavi Kundalik Shinde Gourang Gurudas Haldar	AI Based Financial Statement Analyzer
64	Bhushan Nitin Khamankar Sahil Ravindra Gawande	AI Governance & Model Risk Framework for Financial LLM Tools ALLOTTED
65	Piyush Rohit Darji Abhay Pratap Singh Rajput	AI BASED ESG RISK SCORING OF COMPANIES

Group	Student Name	Capstone Project Report Title (Assigned by Faculty)
66	Pranil Prakash Amrutkar Pranay Dadghaye	AI-Based Stock Market Event Impact Analyzer
67	Atharv Dhananjay Yawale Harshali Dinesh Shinde	AI-powered Investment monitoring and opportunity discovery platform.
68	Sakshi Kiran Dhoot Avantika Kishor Chavan	Agentic AI for M&A Deal Evaluation: Financial Due Diligence, Valuation, Synergy Analysis and Risk Assessment
69	Nishant Vijay Rindhe Rohit Vijay Tirlotkar	AI- Powered Personal Finance Manager
70	Nalin Jain Somya Gupta	AI-Powered Equity Performance Attribution Analysis in Indian Equity Mutual Funds REVISED
71	Ashutosh Paul Sachin Dilip Singh	AI-Powered Financial Decision Intelligence & Scenario Simulator for Corporate Management
72	Tanaya Gajendra Khapre Poonam Anil Hajare	Transmission of US Fed Rate Changes to Indian Equity and Bond Markets: An Event Study REVISED
73	Rahul Shivprasad Pal Gauri Jaydev Atkari	AI CFO — Financial Decision Support Assistant
74	Dnyanesh Arvind Bhosle Arpita Ravindra Pawar	AI-Driven Model for Financial Statement and Ratio Analysis
75	Niranjana Chanda Aniket Gupta	“AI-Based Banking Sector Stock Analyzer: A Buy, Hold, or Sell Recommendation System”
76	ANISHA SARRAF Adarsh Choudhury	An AI-Based Framework for Forecasting Stock Returns Using Corporate Financial Statements
77	Aditya Adhikrao Mohite Shroff Anurag Raju	Related Party Transactions: Disclosure Quality and Governance Outcomes REVISED
78	Nikhil Dinesh Chauhan Bhoomika B M	Do Sector Rotation Signals Work in India? Relative Strength Across NSE Sector Indices REVISED
79	Makhija Bhupendrasing Gulabsing Aditi Anant Sutar	AI-Based Detection of Overvalued and Undervalued Companies
80	Sudhanshu Prashant Pande Pratik Ravi Solanki	AI Powered Credit Rating Analysis
81	Waghmare Onkar Arun Sahil Badrinath Basvekar	AI-Powered Private Equity Fund Intelligence & Investor Reporting System Using RAG
82	NIMISHA SINGH Diksha Satish Gaonkar	AI-Powered Company financial health/credit risk screener
83	Ayush Bhardwaj Nakul Singh Bhadouriya	AI Treasury Risk & Liquidity Optimizer
84	Trupati Vilas Narkhede Tanmay Pravin Dhonde	Can AI Detect “Greenwashing” in Corporate Financial Reports?
85	Nandini Sanjay Kapse Jitu Vyankatesh Annewar	AI-Powered Green Bond Risk & Credibility Analyzer
86	Kunal Tiwari Nayan Kumar Hota	AI-Powered Voice of Customer Analytics for Financial Product and Service Improvement
87	Rashmi Sanjay Chate Japleen Kaur	AI-Powered Investment Verification & Due Diligence: Evidence Behind Every Investment Decision.

Why seventeen projects changed

Every group below is named, with the title it submitted, the title it now carries, and the reason. The subject area was kept in twelve of the thirteen revisions, and group 70 proposed a new finance topic of its own. What changed is the question the project answers. Speak to the faculty if you want to discuss your own.

Grp	Students	Title submitted	Title now allotted	Why it changed
43	Shravani Rajiv Pittulwar Ragini Vinod Kumar Nishad	*"AI-Driven Expense Leakage Detector Model"*	Cost Structure Analysis of Listed Companies: Where Operating Expense Ratios Diverge Within a Sector	**No public data.** No company publishes an expense ledger, so there was nothing to analyse under the secondary-data rule.
27	Pranav Sandip Chavan ANAMIKA SINGH	*"AI-Powered Audit, Compliance & Fraud Risk Detection"*	Auditor Qualifications and Emphasis of Matter: What Do Modified Audit Opinions Predict?	**No public data.** Journal entries are never published. The fraud-detection method had no data to run on.
77	Aditya Adhikrao Mohite Shroff Anurag Raju	*"AI Audit Assistant — Anomaly Detection, Reconciliation, Vouching."*	Related Party Transactions: Disclosure Quality and Governance Outcomes	**No public data.** Reconciliation and vouching need ledgers and invoices, and neither is published.
34	Shubham Soni Shivani Madanbhai Rathod	*"AI-Based Lender-Borrower Matching in Loan Syndication"*	Bank Lending Concentration and Sectoral Credit Risk	**No public data.** Syndicated loan terms in India are private, so the matching model had no evidence base.
72	Tanaya Gajendra Khapre Poonam Anil Hajare	*"Global Finance Updates Dashbaord"*	Transmission of US Fed Rate Changes to Indian Equity and Bond Markets: An Event Study	**No calculation.** A dashboard displays data without analysing it. Twenty of the fifty marks test a calculation.
28	Harshvardhan Soni Utkarsha Bandhe	*"OneView - AI-Powered Multi-Company Watchlist & Real-Time Corporate Announcement Aggregator"*	Which NSE Disclosure Categories Move the Price? Abnormal Returns by Announcement Type	**No calculation.** An aggregator collects announcements but analyses none of them.
62	Sudhanshu Kumar Abhishek Mahesh Chavan	*"An AI-powered platform that delivers only the most relevant market news, events, and updates and analysis for stocks and sectors."*	Does Announcement Timing Affect Price Reaction? Pre-Market versus Post-Market NSE Filings	**No calculation.** Filtering news is a delivery task. There was no financial calculation to defend at the viva.
78	Nikhil Dinesh Chauhan Bhoomika B M	*"AI-Powered Financial Market Intelligence and Investment Decision Support System"*	Do Sector Rotation Signals Work in India? Relative Strength Across NSE Sector Indices	**No calculation.** The project as submitted was the Module 9 class lab rather than a capstone.
25	Piyush Agarwal Joseph Josiah Cardozo	*"Quantum-Inspired Multi-Agent Reinforcement Learning for Regime-Adaptive Dynamic Portfolio Optimization and Intelligent Capital Market Decision-Making"*	Market Regime Detection and Allocation Switching: Does Regime-Aware Allocation Beat a Fixed Mix?	**Cannot be defended.** Quantum-inspired multi-agent reinforcement learning is not taught on this course and could not survive an assumption-defence question.
48	Vaidik Basal Vedika Mahadev Belekar	*"AI driven Tax computation"*	Old versus New Tax Regime: Where the Choice Flips, and How Many Taxpayers Sit Near That Line	**No finding.** Tax computation applies fixed rules. It produces a number, not a finding to interpret.
18	Manish Tripathi Rushikesh Mangesh Thorat	*"AI-Based Individual US Tax Liability Predictor"*	Effective Tax Rates at Indian Listed Companies: Explaining the Gap from the Statutory Rate	**No finding.** Tax liability is computed from published rules, not predicted, and US tax sits outside the ten modules.
33	Sumit Kumar Mandal Rabheru Harsh Manharlal	*"US Tax-Aware FP&A Simulator"*	Do Management Guidance Ranges Predict Reported Results?	**Outside the course.** US tax sits outside the ten modules and outside the market these students work in.
70	Nalin Jain Somya Gupta	*"AI-Powered Reputation & Review Intelligence for Local Businesses"*	AI-Powered Equity Performance Attribution Analysis in Indian Equity Mutual Funds	**Not a finance topic.** Reputation analytics for local businesses is not a finance specialisation subject. The group then proposed this equity performance attribution topic, approved on 11 October 2026.
14	Gupta Sejal Rajkumar Abhinav Panchal	*no title submitted*	AI-Based Corporate Bond Credit Spread & Rating Migration Analyser	**No title submitted.** No title was submitted by the deadline. Fixed income was untaken across all 87 groups.
59	Khushbu Prashant Jaiswal Sachin Sudhir Kanojiya	*no title submitted*	AI-Based Corporate Actions Processing & Reconciliation Engine	**No title submitted.** No title was submitted by the deadline. Corporate actions was untaken and is a direct GCC role.

Grp	Students	Title submitted	Title now allotted	Why it changed
64	Bhushan Nitin Khamankar Sahil Ravindra Gawande	*no title submitted*	AI Governance & Model Risk Framework for Financial LLM Tools	**No title submitted.** No title was submitted by the deadline. Module 7, AI governance, had no project at all.
46	Aayush Vishal Karwa SOUMIK SADHUKHAN	*"AI WealthPilot"* *"An AI-Powered Investment Allocation, Trade Risk Assessment and Algorithmic Strategy Optimization System"*	AI WealthPilot - AI-Powered Investment Allocation, Trade Risk Assessment & Algorithmic Strategy Optimisation	**Two titles submitted.** Each student entered a different title. A group carries one project, so the two were merged.

Titles are final and allotted by the subject faculty. Refer to the Capstone Project Expectations document for the research question, data source and deliverables for each group.
Issued 14 August 2026.
